Protection

Kaspersky Open Space Security Suite

- Kaspersky Work Space Security – for Workstations and Mobile Devices
- Kaspersky Business Space Security – for File Servers
- Kaspersky Enterprise Space Security – for Mail Servers
- Kaspersky Total Space Security – for Internet Gateways

It only takes a single vulnerability to compromise your *entire* system!

Why Choose Kaspersky?

- Protection against malware, spyware, hacker attacks and spam at all levels
- On-the-fly scanning of email and Internet traffic
- Personal firewall for protection on any type of network, including Wi-Fi
- Centralized installation, management and updates
- Device Control to manage employee use of removable media
- Dedicated security policy for remote users
- Comprehensive reports on network protection status

Kaspersky Security Solutions are available to meet the needs of every type of organization
